**Instructions for Use**
Wire Guides with Extension

1. Insert the wire passer around the bone (all shown below).

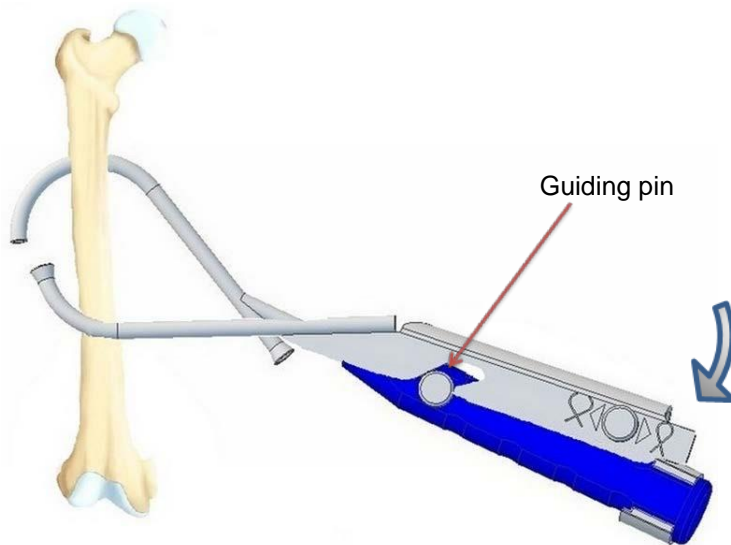

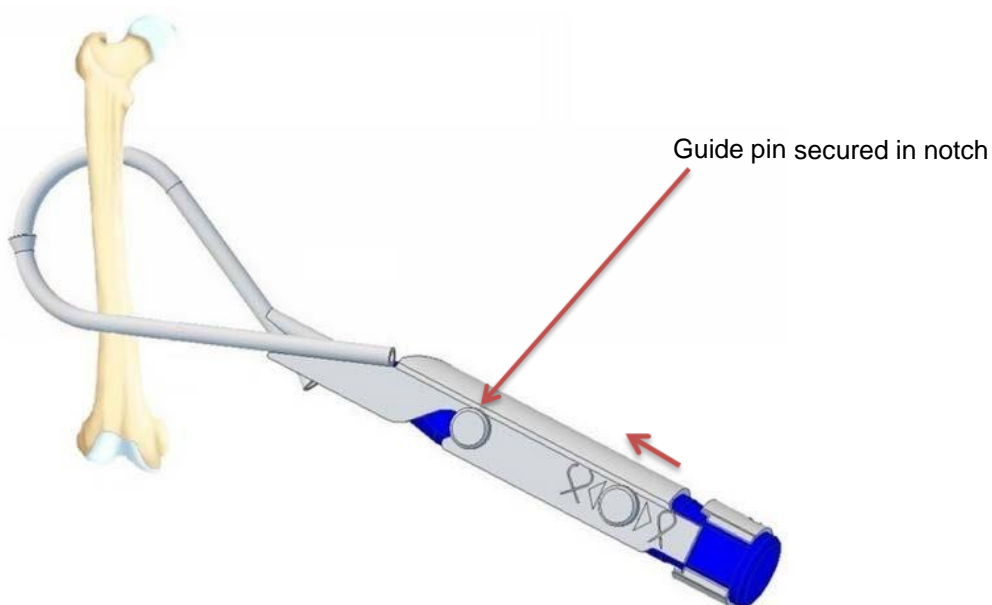

2. Insert the auxiliary tool.

3. Combine and close both components.

Guiding pin

- Put the notch of the auxiliary tool over the guiding pin and gently slide the components together.
- Align the handle and the auxiliary tool. During the process, the auxiliary tool slides in the notch.

### 4. Check the correct position once connected.

- Align the auxiliary tool until it reaches the end of the notch.

Guide pin secured in notch

5. Lock the components by turning the safety ring.

Turn the safety ring until it hits the stop pin.

6. Insert the wire.

Wire

- Insert the wire in the direction indicated by above black arrows.
- Disassembly occurs in reverse order. Make sure that the wire does not retract during the process.
